SCS Opens Parylene Coating Center in Dublin, Ireland

(Indianapolis, Indiana, USA) Specialty Coating Systems announces the opening of their new Parylene coating facility in Dublin, Ireland. The SCS Ireland coating facility will specialize in Parylene custom coating service for the fast growing Ireland medical device industry. This facility will complement SCS Europe's multi-purpose coating facility in Woking, United Kingdom. Terry Bush, Director of Worldwide Operations explains, "The SCS Ireland facility further establishes SCS' global presence and Parylene coating leadership.

"To service our customers in the medical device industry, SCS maintains multiple clean room facilities, FDA Device and Drug Master Files, and USP Class VI certification. Specialty Coating Systems also sponsors multiple research studies on the biocompatibility and sterilizability of Parylene, in addition to other Parylene polymer research."

Parylene is a vacuum deposited, thin film coating used in the medical device industry on stents, catheters, mandrels, cardiac assist devices, microtrays, cannulas, and numerous other medical devices. SCS has over 30 years experience in Parylene medical coating technology and serves its customers with coating facilities located throughout Europe, Asia and North America.

For more information on SCS' worldwide Parylene coating capabilities, contact SCS at 001-317-244-1200, or e-mail scssales@cooksonelectronics.com.
